SELORM AMEKUEDEE

DATA ANALYST

amekuedees@gmail.com · United Kingdom · linkedin.com/in/selorm-amekuedee · github.com/blue-wiz

Data Analyst with 6+ years of experience turning data from finance, energy and technology settings into decisions. Skilled in SQL, Python, Power BI and Tableau, with a record of cutting reporting time by 60%, saving 10+ hours a week through automated data-quality audits, and building KPI dashboards used by senior leadership. MSc Data Science & Applied Analytics (Distinction). Comfortable owning the full path from stakeholder requirements to data model, analysis and presentation.

CORE TOOLS

SQL, Python (Pandas, NumPy, SciPy, Scikit-learn, PyMC), R, Power BI (DAX), Tableau, SSRS, SSIS, Microsoft Azure (ADF), Excel (Pivot Tables, VBA), Microsoft & G-Suite, Jira, Dynamics CRM, GitHub, HTML

CORE SKILLS

- Database Management
- Reporting
- Stakeholder Management
- Change Management
- Business Intelligence
- Business Analysis
- Machine Learning
- Statistical Analysis
- Business Process Optimisation
- Project Management
- A/B & Feature Testing
- Data Modelling & ETL

PROFESSIONAL EXPERIENCE

AI Model Training Specialist · Outlier Sep 2024 – Present

- Improved model accuracy by 18% on a natural language generation project by extracting, structuring and labelling training data with Python and Pandas.
- Built automated data-quality audits in Python (NumPy, SciPy) for labelled datasets, cutting human error and saving 10+ hours per week.
- Used statistical tests and exploratory analysis to check training-data distributions, keeping inputs balanced and reducing bias in model outputs.
- Redesigned data preparation around stakeholder needs, reducing downstream post-processing by 40% and making outputs ready for BI reporting.
- Shared analytical findings in cross-team syncs and aligned annotation goals with machine learning project objectives.

Senior Data Analyst · Lifestalia Sep 2021 – Aug 2024

- Built a real-time Tableau KPI dashboard for senior management, giving them a single view of organisational and financial performance.
- Analysed multi-channel customer feedback, extracted with SQL and visualised in Power BI, to identify sentiment drivers and priorities for customer support.
- Evaluated marketing campaigns across social media, email and webinars and advised the team to shift spend toward the channels that attracted most customers.
- Designed interactive Tableau dashboards on operational metrics that helped business leaders spot areas for improvement.
- Ran validation checks across ingestion, transformation and analysis, keeping reporting data accurate, complete and compliant with governance standards.

Data Analyst · Ministry of Energy Oct 2020 – Aug 2021

- Led the migration of reporting to Power BI, from stakeholder engagement through data modelling, cutting monthly reporting time by 60% and giving leadership real-time figures.
- Built a feedback dashboard pulling data via APIs, transformed in Python and presented in Power BI; the insights drove a 17% improvement in experience scores.
- Led root-cause analysis with SQL and Python on operational KPIs, finding scheduling bottlenecks and cutting waiting time by 18%.
- Ran requirements workshops and weekly reporting check-ins with senior stakeholders, turning dashboard insights into sprint priorities.
- Built Excel cost models and forecasts that helped reduce supply chain lead times by 20% through early detection of inventory shortages.

KYC Data Analyst · Bank of Africa Jul 2018 – Sep 2020

- Automated reporting with Python (Pandas, Matplotlib), saving up to 80% of the time previously spent on manual reports.
- Wrote SQL queries to detect potential fraud and flag high-risk customer profiles, strengthening the bank's compliance framework.
- Built Scikit-learn models to flag fraudulent transactions from user behaviour, location anomalies and transaction timing.
- Streamlined onboarding and data migration workflows, improving turnaround times by 30% while meeting regulatory requirements.
- Delivered analyses of suspicious activity to management and trained junior analysts in SQL and Excel.

QUALIFICATION

- **MSc Data Science & Applied Analytics**, Distinction · University of Lincoln · 2024. Dissertation: predictive modelling of football injuries and their financial impact on Premier League clubs (Python, NetLogo agent-based simulation).
- **BA Economics** · University of Ghana · 2020
